Finding Your Inner Fish

2011 Distinguished Lecturer

Neil H. Shubin, Ph.D.

Paleontologist & Professor of Anatomy

University of Chicago

Provost, The Field Museum

Can you imagine a time when fish had legs? Dr. Shubin's discovery, *Tiktaalik roseae*, made headlines around the world. Dubbed the "missing link" between fish and land animals, the *Tiktaalik roseae* provides a glimpse into a time when fish ventured out onto land. Dr. Shubin's findings are chronicled in his book, *Your Inner Fish: A Journey Through the 3.5-Billion-Year History of the Human Body* (Pantheon Press). Join Dr. Shubin on a journey through time and discover a fishier side to evolution.

Please join us for a cocktail reception, and to view *Tiktaalik roseae* in the Museum of Natural History & Science.

Reception and *Tiktaalik roseae* viewing: 6 p.m.
Lecture: 7:30 p.m.
Book signing: 9 p.m.

Reakirt Auditorium
Thursday, May 19

**All events are free and
open to the public**

*Support provided by the University of Cincinnati
Department of Geology*
