

# Learn the Wildflowers!

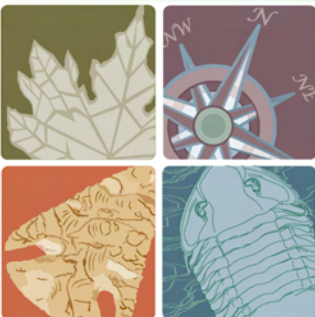

## Wildflowers of Ohio

**Summer Course 2014**  
**(Biol 1009C)**

**May 12 to May 30**  
**Tues./Thurs. 10:00 AM-1:30 PM**  
**Sat. 9:00 AM-4:00 PM**

For the non-biology major, this course provides an introduction to the diversity of the families of flowering plants, with an emphasis on plants growing wild in the Ohio/Indiana area. Students will learn the plant anatomy and terminology involved in the acquisition of plant identification skills and will learn about the ecology of plants encountered on field trips. The course will be based at the UC Center for Field Studies at Miami Whitewater Forest during May (a great time for spring wildflowers!). Other locations such as Shawnee Lookout, Fernald Preserve, and the Oxbow Area will also be visited. Dr. Denis Conover is the instructor.
